When using the DMP-2100 with fan-fold paper, start printing at least 1/2"
below the tops of the form (perforation) and stop printing at least 1/2"
down before the bottom perforation. Other applications may require that you
specify the number of lines per page via the FORMS command.

```
┌─────────────────────────────────────────────────────────────────┐
│ o                                                             o  │  \/
│   ┌─────────────────────────────────────────────────────────┐   │  |
│ o │ │││││││││││││││││││││││││││││││││││││││││││││││││││││││││ │ o │  |<1/2"
│   ├─────────────────────────────────────────────────────────┤   │  *
│ o │ │││││││││││││││││││││││││││││││││││││││││││││││││││││││││ │ o │  |<1/2"
│   └─────────────────────────────────────────────────────────┘   │  |
│ o                                                             o  │  /\
└─────────────────────────────────────────────────────────────────┘
```
